

**PHASE I ARCHITECTURAL SURVEY  
HAMPTON ROADS BRIDGE TUNNEL  
CITIES OF HAMPTON AND NORFOLK, VIRGINIA  
DHR REVIEW #2011-0804**

**MANAGEMENT SUMMARY  
November 2011**

On behalf of the Virginia Department of Transportation (VDOT) and Rummel Klepper & Kahl (RK&K), Dovetail Cultural Resource Group I, Inc. (Dovetail) conducted an architectural survey for the Hampton Roads Bridge Tunnel (HRBT) study area. The Virginia Department of Transportation (VDOT), in cooperation with the Federal Highway Administration (FHWA), is studying the environmental consequences of transportation improvements to Interstate 64 (I-64) and the HRBT. The study corridor extends from I-664 in the City of Hampton to I-564 in the City of Norfolk, a distance of approximately 12 miles, including the 3.5-mile-long HRBT. The study corridor encompasses lands and waterbodies within or adjacent to the I-64 corridor that could potentially incur direct or indirect impacts as a result of the proposed project. Because of FHWA funding, VDOT is completing an Environmental Impact Statement (EIS) on the project, in compliance with the National Environmental Policy Act. As such, the undertaking is required to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (36 CFR 800). The project is being completed by VDOT as State Project No. 0064-965-004, P100/UPC 99037 and Virginia Department of Historic Resources (DHR) File No. 2011-0804.

The Area of Potential Effect (APE) for above-ground resources includes all parcels directly abutting the project and parcels directly adjacent to the abutting parcels (see attached maps). This APE enveloped properties where direct or indirect alterations to setting and feeling could occur within the existing Interstate highway corridor.

***Project Methodology***

The project included a background literature review and a field investigation of the entire study APE. The background review was completed at the DHR and in both localities to gather data on previous surveys in the study area, identify previously recorded resources, understand the general parameters of all parcels in the APE, and note properties that are over 45 years in age. Once a list of these properties was crafted, the fieldwork included an inspection of all resources that have not been previously evaluated as individual properties and that meet the minimum age criteria for consideration for inclusion in the National Register of Historic Places (NRHP).

The APE was visually inspected by Dovetail through a vehicular and pedestrian reconnaissance to identify buildings, objects, structures, and districts on the property list developed during the background review. Once identified, each resource was evaluated for architectural significance, and historic and physical integrity. The resources were documented through written notes, black

& white photographs, and digital photographs. The information obtained during the survey was then used to create a Data Sharing System (DSS) form and make recommendations on the property's NRHP potential.

Fieldwork was conducted between July and October 2011. Work was completed by Danae Peckler, Carthon Davis, Heather Dollins, Sally Stephens and Kerri S. Barile (Principal Investigator). Dr. Barile meets the Secretary of the Interior standards for Architectural Historian.

### ***Project Results***

In total, the team identified 546 properties that meet the NRHP age criteria within the study APE. Of the 546 properties, 11 have been previously recorded and determined to be Potentially Eligible, Eligible or are Listed in the NRHP and 40 have been recorded and previously determined to be Not Eligible for the NRHP by the DHR. The remaining 495 are properties that have been previously recorded but not evaluated or have not been recorded with the DHR to date. The project results will be discussed in these three groups.

#### *Previously Determined Eligible/Listed Resources*

Eleven resources in the study APE have been previously determined to be Potentially Eligible, Eligible or are Listed in the NRHP (Figure 1; Table 1). The Fort Monroe Historic District (114-0002) is a National Historic Landmark (NHL), while two resources within the district—Old Point Comfort Light/Fort Monroe Lighthouse (114-0021/114-0002-0012) and Chamberlin Hotel (114-0114/114-0002-0006)—were also listed in the NRHP as individual properties. Other nearby properties listed in the NRHP are Fort Wool/Fort Calhoun (114-0041), Hampton National Cemetery (114-0148), Pasture Point Historic District (114-0118), and the Phoebus Historic District (114-5002). With the exception of the Old Point Comfort Light and the Chamberlin Hotel, individual resources within these districts have not been evaluated for NRHP eligibility. Any individual resource within the current study APE was, thus, recorded as an individual property and evaluated during this study (see page 8 for results).

Hampton University (114-0006), also known as the Hampton Institute, is both an NHL and listed in the NRHP. However, the resource has different NHL and NRHP boundaries. When the property was listed in the NRHP in 1969, it comprised a 200-acre, square-shaped property that crosses the I-64 corridor. Upon listing as an NHL in 1976, the NHL boundaries were redrawn to encompass the original 15-acre core campus and the college cemetery (both located south of the current APE) and Emancipation Oak (within the study APE), and not the full 200 acres used during the NRHP nomination process seven years earlier. Upon review of the revised boundaries in 1978, the Keeper of the NRHP rejected the modification, noting no definable reason to adjust the original boundaries, thus accounting for the two sets of resource boundaries in existence today. Because it is part of an NHL and guidelines request that individual properties within NHL boundaries not be evaluated on their own merit, Emancipation Oak has not been evaluated as an individual resource.

The Hampton Veterans Affairs Medical Center Historic District (114-0101) is Eligible for the NRHP. A draft NRHP nomination was prepared in 1980 and updated in 1994, but to date, this resource has not been successfully listed.

Table 1: Previously Recorded Eligible or Listed Properties in the HRBT APE.

Resource Name	Resource Number	Date	NRHP/NHL Status
Fort Monroe Historic District	114-0002	circa 1819	NHL
Hampton Institute (University) - (African American)	114-0006	pre-1886	Different NHL & NRHP boundaries
Old Point Comfort Light (Fort Monroe Lighthouse)	114-0021 (114-0002-0012)	1802	NRHP Listed
Fort Wool (Fort Calhoun)	114-0041	1819	NRHP Listed
Hampton Veterans Affairs Medical Center Historic District	114-0101	circa 1854	Eligible; draft nominations (1980, 1994); not listed
Chamberlin Hotel	114-0114 (114-0002-0006)	1928	NRHP Listed
Pasture Point Historic District	114-0118	1870	Eligible
Hampton National Cemetery	114-0148	circa 1866	NRHP Listed
Phoebus Historic District	114-5002	1874	NRHP Listed
Battle of Hampton Roads	114-5471	1862	Potentially Eligible
Battle of Sewell's Point	122-5426	1862	Potentially Eligible

The remaining two properties are large battlefields: Battle of Hampton Roads (114-5471) and Battle of Sewell's Point (122-5426) (Figure 2). Both are Civil War-era battle districts that were first identified by the American Battlefield Protection Program. The DHR listed each as an above-ground resource, and both have been determined to be Potentially Eligible for the NRHP. Neither has undergone an intensive survey, however, to ascertain the validity of the currently proposed resource boundaries or confirm their eligibility for the NRHP.

As they have been previously evaluated, none of these 11 properties were revisited during the current Phase I study.

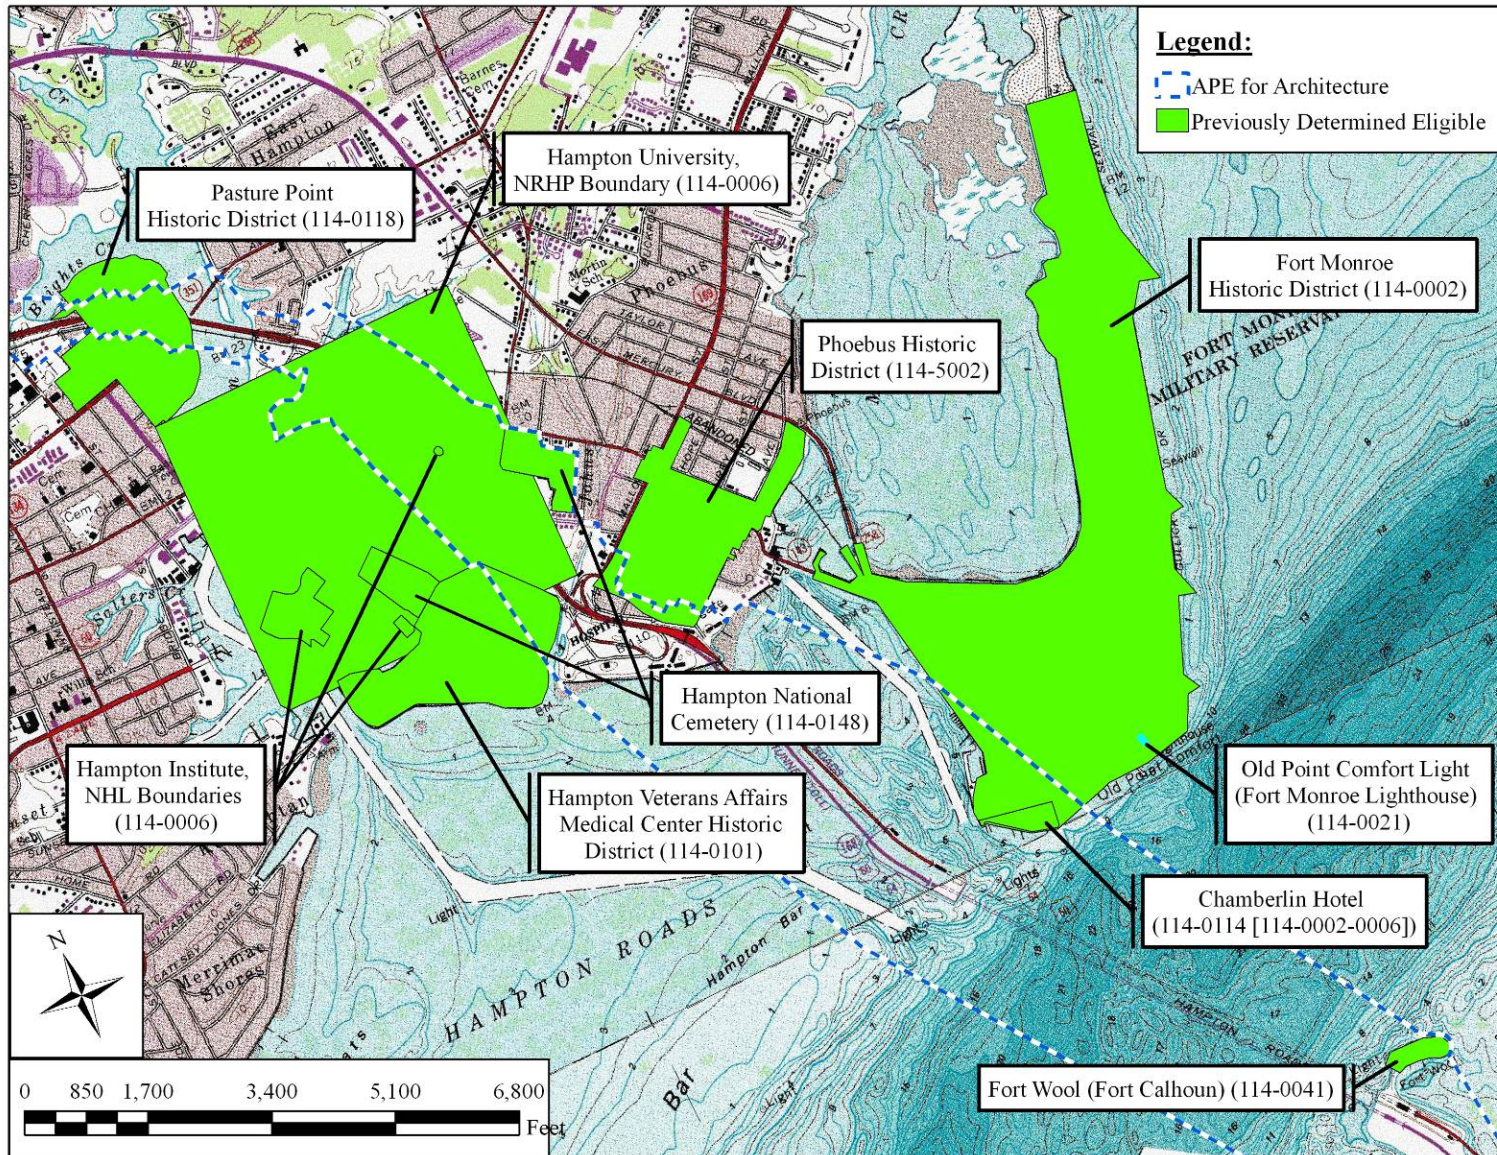

Figure 1: Location of Resources Previously Determined to be Eligible for or Listed in the NRHP in the HRBT APE.

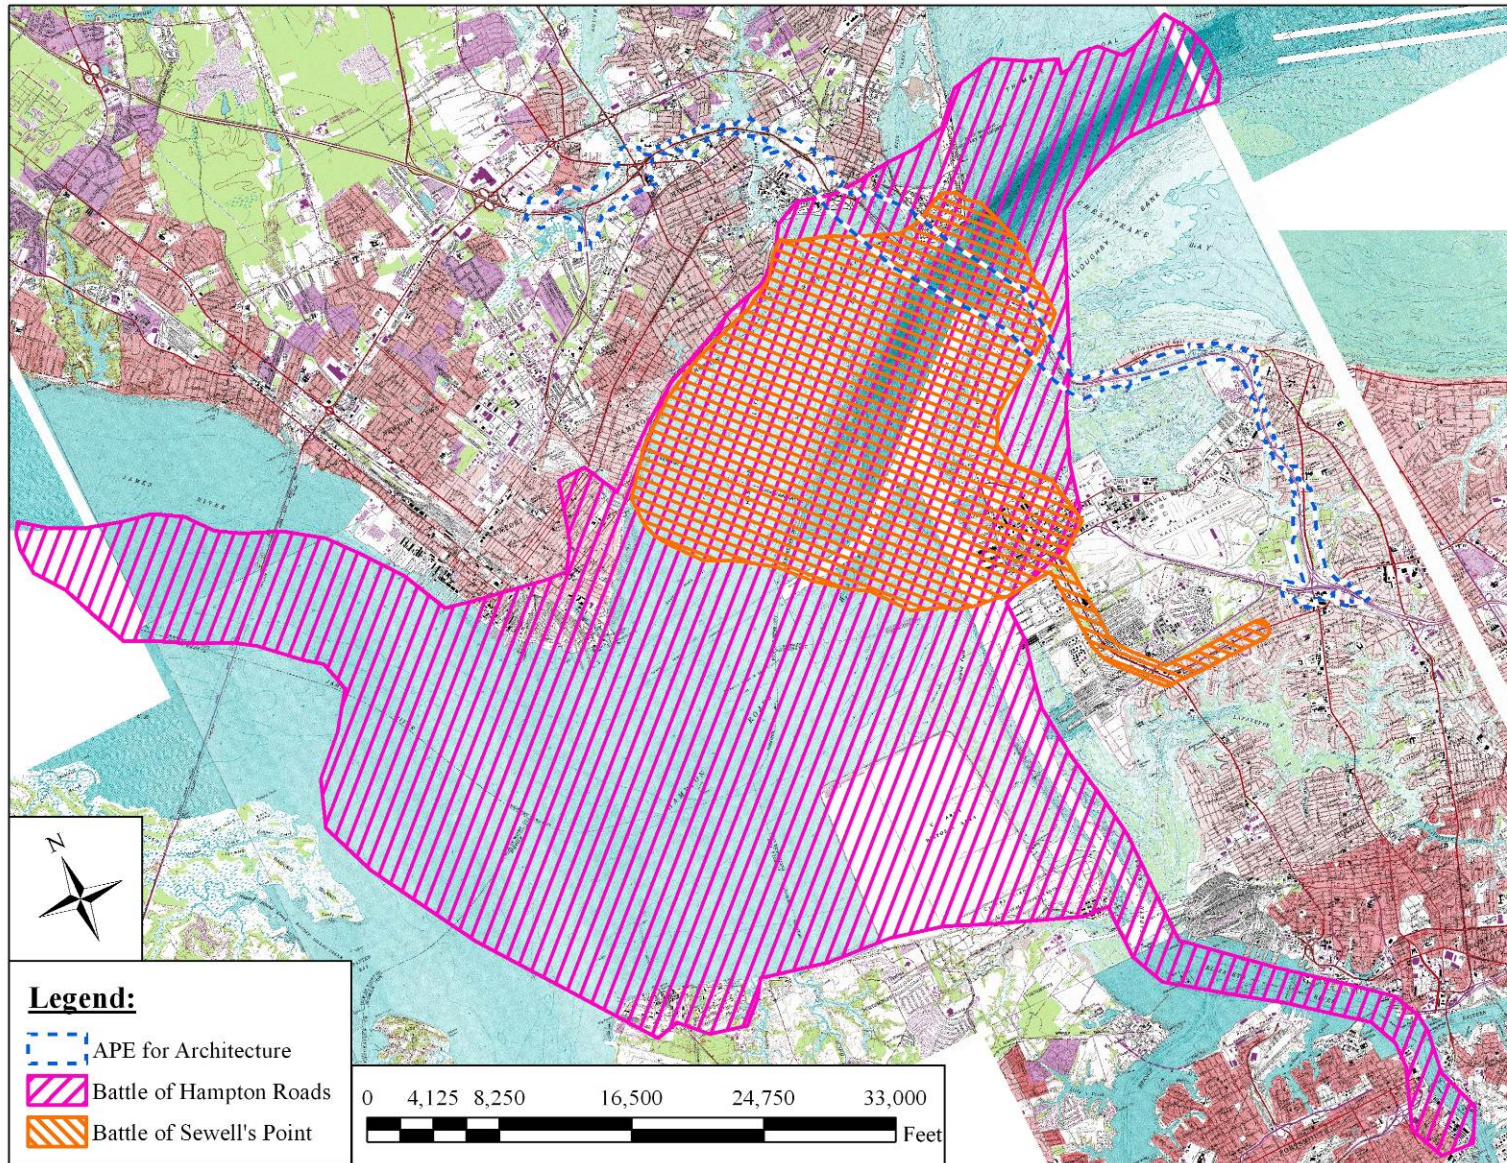

Figure 2: Location of Two Battlefields Recorded at the DHR in Relation to HRBT Study APE.

*Previously Determined Not Eligible Resources*

The remaining 40 of the 51 previously recorded properties in the APE have been determined to be Not Eligible for the NRHP by the DHR (Table 2). Of these resources, four are neighborhoods, one is an industrial building (Pump House, 114-5010), one is a structure (Bridge #1804, 114-5018), and 34 are buildings (single dwellings). The pump house, bridge, and most of the dwellings date to the first half of the twentieth century and are common designs seen throughout this area.

The four previously recorded neighborhoods are all located in Norfolk and cluster around the I-64 corridor. The Willoughby Bay Neighborhood (122-5048), Commodore Park Neighborhood (122-5050), Pamlico Neighborhood (122-5051), and Willoughby Terrace Neighborhood (122-5052) were recorded through previous federal- and state-compliance surveys and cost-share efforts. All four comprise residential areas developed in the first half of the twentieth century, with most of the buildings post-dating World War II. Each of these neighborhoods was found to be Not Eligible as a resource due to compromised integrity of individual elements and lack of a cohesive feeling, setting and association.

Table 2: Properties Previously Determined to be Not Eligible for the NRHP.

<b>DHR Number</b>	<b>Property Name</b>	<b>Property Street Name</b>	<b>Year Built</b>	<b>Associated District/ Neighborhood</b>
114-0003	Roseland Manor (Strawberry Banks Manor House) (destroyed)	Strawberry Banks Boulevard	circa 1886

122-5082 (122-5050-0015)	Joseph Abbott House	8590 Executive Drive	1950	Commodore Park

*Newly Recorded/Not Previously Evaluated Resources*

The remaining 495 resources have not been previously evaluated by the DHR. The resources are located throughout the APE, with 115 properties (23 percent) in the City of Hampton and 380 properties (76 percent) in the City of Norfolk. The majority of these properties (n=276; 55 percent) post-date World War II, with 18 of these (4 percent of the overall assemblage) representing commercial and ecclesiastic development with the remaining 258 (52 percent of the total) being examples of post-World War II housing and housing-related properties (such as pump houses). The fact that over half of the properties in this survey represent the post-War population boom near the Naval facility is not uncommon for such areas.

An additional 42 percent of the surveyed properties (n=209) are residential or commercial properties dating to the first and second quarters of the twentieth century from 1900 until 1945, representing the expansion of this area as both a naval hub and a seaside vacation destination. Many of the dwellings constructed during this period are located on Willoughby Spit, highlighting the early-twentieth century focus on the development of oceanfront and ocean-adjacent lots.

Only 10 properties (2 percent of the total count) pre-date the twentieth century. Primarily located in what are today the Willoughby Beach and Pasture Point neighborhoods, these properties are near the waterways while not being directly waterfront land, highlighting the early development of this area comprising larger parcels of land that were later subdivided. Each of these earlier buildings—including nine homes and the Elmerton Cemetery (114-0155)—is now surrounded by twentieth-century construction, new roadways, and modern utility lines.

For five of the recorded resources, it is suggested that additional data is warranted to render a recommendation on NRHP eligibility (Table 3; Figure 3). Forest Lawn Cemetery (122-0531) at 8100 Granby Street contains more than 240,000 interments and was originally designed in 1906 for the City of Norfolk. The property contains the family burial plot of the Langleys, an early Norfolk area family with markers dating from the late 1700s. This designed landscape features elements of the “rural model,” “lawn plan,” and “memorial park” concepts that were evolving in early-twentieth-century cemetery design. Forest Lawn Cemetery is one of eight public cemeteries operated by the City of Norfolk. This resource may embody the distinctive characteristics of early-twentieth century cemetery design. Though the architect and landscape designer are unknown at this time, Forest Lawn Cemetery and its contributing features retain a high level of historic integrity. At present, there remains insufficient data by which to evaluate this resource; therefore, additional information is required prior to any assessment of NRHP eligibility.

Table 3: Properties Suggested for Additional Research to Render NRHP Recommendations.

<b>DHR Number</b>	<b>Property Name</b>	<b>Property Address</b>	<b>Year Built</b>	<b>Description</b>
122-0531	Forest Lawn Cemetery	8100 Granby Street	circa 1906	Curvilinear cemetery with historic gate house and mausoleum
122-0775	House	134 West Bayview Boulevard	1947	1-story, 4-bay, Art Moderne dwelling clad in stucco and covered by a flat roof <i>(previously determined Not Eligible but reevaluated at request of the DHR)</i>
122-5434	Merrimack Landing	8807 Monitor Way	1941	Multi-family apartment complex with French Eclectic influences; buildings are clad in vinyl or brick and are covered by a hipped or side gable roof
122-5435	House	729-731 West Ocean View Avenue	1925	1-story, 3-bay, International building covered in stucco and covered by a flat roof
122-5436	House	1163 Little Bay Avenue	1938	2.5-story, 2-bay, Dutch Colonial Revival house clad in a 6:1 common-bond, brick veneer and asbestos siding covered by gambrel roof; also features several gable-end dormers and 6/6 wood-framed windows

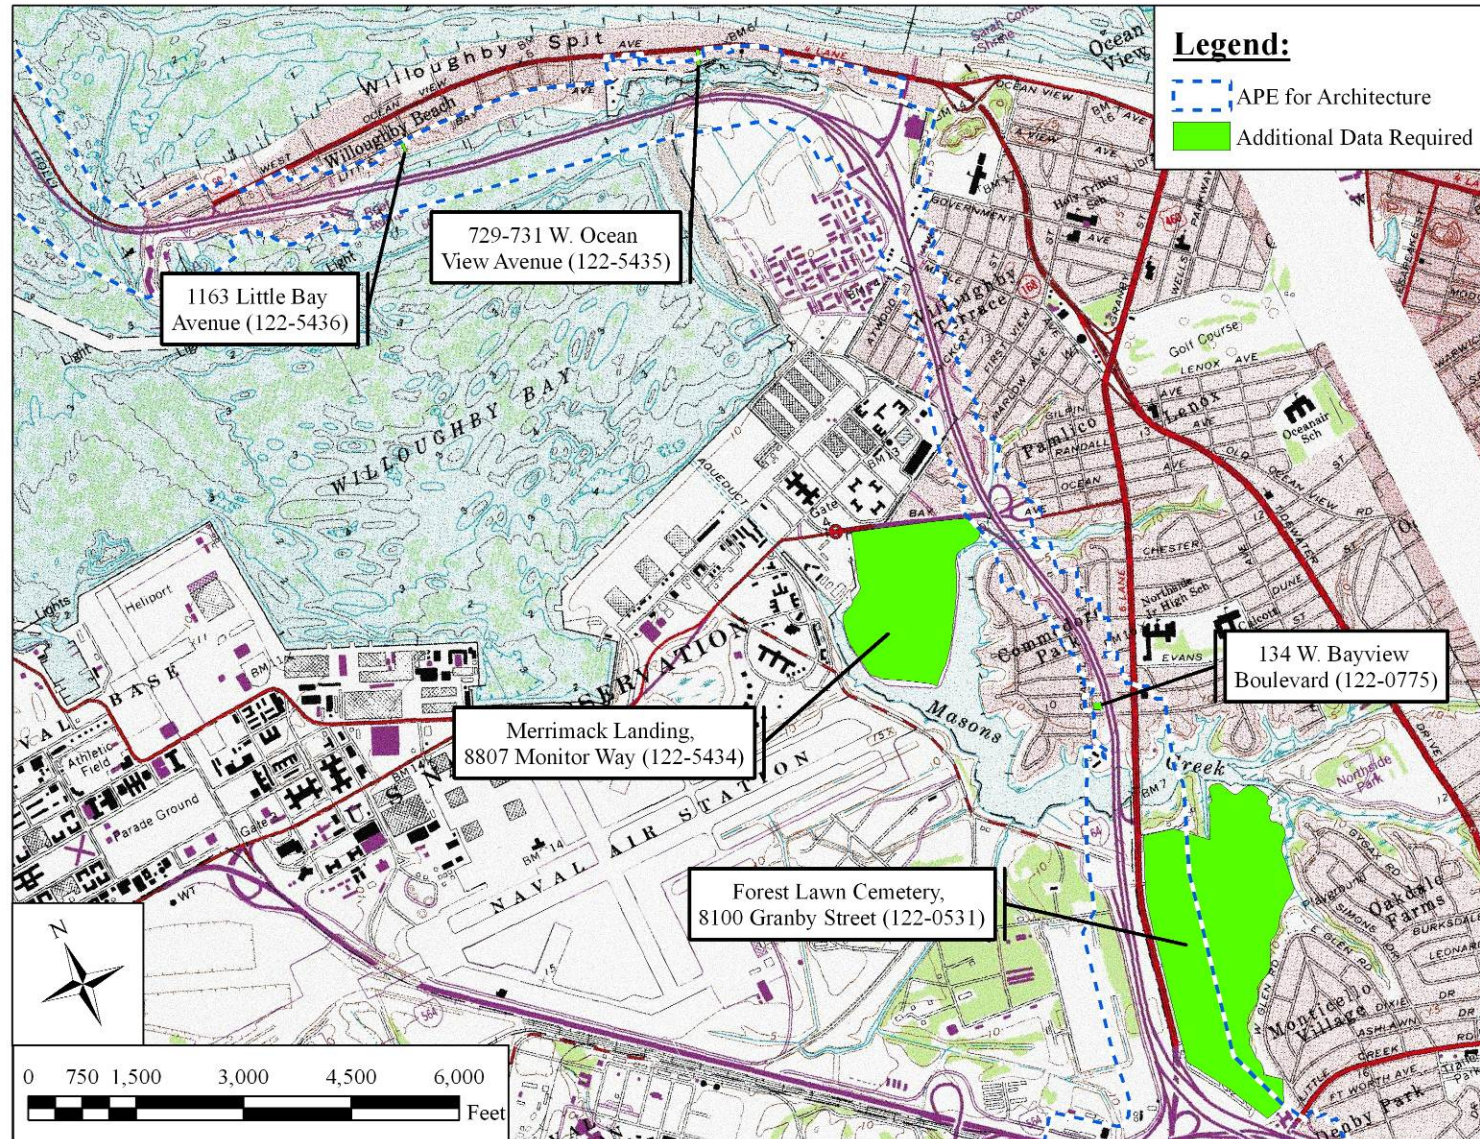

Figure 3: Location of Five Properties Recommended for Additional Research.

The House at 134 West Bayview Boulevard (122-0775) was previously surveyed and determined to be Not Eligible by the DHR in 2000. However, during initial project scoping for the HRBT undertaking, the DHR requested that this resource be re-evaluated. It is suggested that this property may embody the distinctive characteristics of early-twentieth century, Art Moderne architecture in the Commodore Park Neighborhood district. Its form and design features stand out amongst the many Colonial Revival, Minimal Traditional, and Ranch houses in the area. The building appears to retain its integrity of location, design, materials, and workmanship, with integrity of setting, feeling and association to be determined. Additional information is required prior to any further assessment of NRHP eligibility.

The housing complex at 8807 Monitor Way (122-5434) was erected in 1941 with financial assistance from the United State Housing Authority and designed by the Norfolk Association of Architects. It is currently known as Merrimack Landing, and appears to be a privately-operated residential neighborhood. Though the primary architects involved in its construction are not yet known, the complex appears to retain its integrity of location, design, materials, and workmanship, with integrity of setting, feeling and association to be determined. At present, there remains insufficient data by which to evaluate this resource. As such, additional information is required prior to any assessment of NRHP eligibility.

The House at 729–731 West Ocean View Avenue (122-5435) is a good example of mid-twentieth century, International-styled architecture in the Willoughby Beach Neighborhood district. Its simplistic form and design features pre-date many of the remaining properties in this area. The house appears to retain its integrity of location, design, materials, and workmanship, with integrity of setting, feeling and association to be determined. At present, there remains insufficient data by which to evaluate this resource, therefore, additional information is required prior to any assessment of NRHP eligibility.

The House at 1163 Little Bay Avenue (122-5436) is a good example of early-twentieth century, coastal architecture executed in the Dutch Colonial Revival style in the Willoughby Beach Neighborhood historic district. Based on the size and stylistic detail of the residence, it is likely an architect-designed resource. Though the architect is unknown at this time, the house appears to retain its integrity of location, design, materials, and workmanship, with integrity of setting, feeling and association to be determined. At present, there remains insufficient data by which to evaluate this resource. As such, additional information is required prior to any assessment of NRHP eligibility.

Of the remaining 490 recorded properties, 488 are buildings, including 468 residential resources (both single- and multi-family), 7 commercial properties, 1 industrial parcel, 5 ecclesiastic structures, and 7 other use categories (**Error! Reference source not found.** and **Error! Reference source not found.**). As aforementioned, the vast majority of the recorded building stock comprises post-World War II housing associated with expansion of Norfolk-area naval services and associated businesses and the accompanying dramatic rise in area population. Housing types found within the corridor include single-family dwellings (Minimal Traditionals, Cape Cods, Bungalows, Ranches, Colonial Revivals, and other vernacular forms) and multi-family apartment buildings, many with Colonial Revival attributes. A majority of the residential properties are located in previously recorded historic districts and neighborhoods, including

Pasture Point (114-0118; Eligible for the NRHP), Phoebus (114-5002; Listed on the NRHP), Willoughby Beach (122-5048; Not Eligible for the NRHP), Commodore Park (122-5050; Not Eligible for the NRHP), Pamlico (122-5051; Not Eligible for the NRHP), and Willoughby Terrace (122-5052; Not Eligible for the NRHP) (See previous tables for resource dates and additional information). Although the surrounding neighborhoods were recorded with the DHR and evaluated for NRHP potential, few of the resources within each neighborhood have been previously evaluated as individual properties.

Most of these 488 building-based properties have undergone modifications since their original construction, including new windows and doors, new siding, changes to the building plan and arrangement, large additions, and changes in their setting. Also, many are examples of building types that are commonplace throughout this area, and do not exhibit high artistic value as the work of a master. As such, it is suggested that these 488 newly recorded or not previously evaluated buildings are Not Eligible for the NRHP as individual properties under Criterion C. Further, the buildings have no known association with an important event or individual, and as such, they are also recommended Not Eligible under Criteria A or B. The properties have not been evaluated under Criterion D.

Only two of the remaining 490 properties are not buildings: the Pembroke Avenue Bridge Abutment and Road Trace (114-5505) and Elmerton Cemetery (114-0155). The Pembroke Avenue abutment and road trace are remnants of a larger resource that once included a bridge, which was demolished by VDOT under an earlier Federal undertaking. Since the bridge was removed, the remaining elements have been neglected and are overgrown with grasses, shrubs, and young trees. To accompany the neglect, regular flooding of the area is evident, as well as the harsh erosion from brackish waters on the concrete surfaces. This resource is a fragment of a demolished property and, as such, doesn't retain any integrity of the original property's design, materials, setting, or feeling—both on its own and as a non-contributing element to the Pasture Point Historic District. Considering the ruinous condition, along with no known association with an important event or individual, the Pembroke Avenue Bridge Abutment and Road Trace is recommended Not Eligible for individual listing in the NRHP under Criteria A–C. The resource was not evaluated under Criterion D.

The Elmerton Cemetery (114-0155) is an African American burial ground, located near downtown Hampton. Although a cemetery for the first generation of African Americans following emancipation, including Mary Peake, the cemetery suffered from decades of neglect during the twentieth century. In an effort to restore the cemetery, volunteers dedicated time to clear overgrowth and debris, sadly causing significant damages as well. While the cemetery was established during a crucial time in African American history, and contains the remains of an important individual, the cemetery is in extreme poor condition, and historic African American landmarks with a higher degree of integrity exist within the region. As such, the resource is recommended Not Eligible for individual listing in the NRHP under Criteria A–C. The resource was not evaluated under Criterion D.

### *Summary*

In sum, 546 total properties that meet the NRHP age criteria are located within the HRBT Phase I study corridor. Eleven of these properties have been previously determined to be Potentially Eligible, Eligible, or are Listed in the NRHP, and 40 have been determined to be Not Eligible for the NRHP. No work was conducted on these properties as part of this survey. An additional five properties are newly evaluated resources where additional data will help evaluate each resource for NRHP potential. The remaining 490 resources are recommended Not Eligible for the NRHP, as they do not meet significance and/or integrity thresholds for this area.

Table 4: Properties Recorded During HRBT Architectural Survey and Recommended Not Eligible for NRHP (by DSS number).

DHR Number	Property Name	Property Address Number	Property Street Name	Year Built	Description
114-0118-0001 (114-0118-0158)	House	403	East Pembroke Avenue	1910	2.5-story, 4-bay, Colonial Revival dwelling is clad in weatherboard and is covered by a low-pitched hipped roof
114-0118-0002	House	415	East Pembroke Avenue	1900	2.5-story, 3-bay, Queen Anne and Shingle-style, single-family dwelling clad in weatherboard and wood shingles and covered by a hipped roof with gable dormers
114-0118-0004	House	433	East Pembroke Avenue	1890	2.5-story, 4-bay, Queen Anne-style dwelling clad in wood weatherboard with fish-scale shingles in the gable peak and is covered by a front gable roof
114-0118-0008	House	623	River Street	1910	2.5-story, 3-bay, Colonial Revival dwelling clad in wavy-bottom asbestos siding and covered by a hipped roof
114-0118-0095	House	511	Marshall Street	1900	1-story, 3-bay, vernacular, single-family dwelling clad in vinyl siding and covered by a front gable roof
114-0118-0109	House	509	Marshall Street	1905	2-story, 3-bay, vernacular, single-family dwelling clad in stucco and covered by a hipped roof
114-0118-0111	House	502	Marshall Street	1895	2-story, 3-bay, Colonial Revival-style , single-family dwelling clad in a brick, stretcher-bond veneer clad in a hipped roof
114-0118-0112	House	418	Marshall Street	1895	2.5-story,3-bay, Queen Anne-style, single-family house clad in vinyl siding with shingles on the second story and covered by a front gable roof
114-0118-0113	House	538	River Street	1941	2.5-story, 3-bay, American Foursquare dwelling clad in vinyl siding and covered by a hipped roof
114-0118-0114	House	540	River Street	1959	1-story, Ranch-style house clad in a brick, stretcher-bond veneer with wood shingles in the gable ends
114-0118-0115	House	542	River Street	1961	2-story, 3-bay, American Foursquare dwelling clad in wood shingles and covered by a hipped roof
114-0118-0116	House	622	River Street	1910	2-story, vernacular-style dwelling, with Colonial Revival elements, clad in vinyl siding and covered by a hipped roof
114-0118-0125	House	316	Cooper Street	1948	1-story, 3-bay, vernacular dwelling clad in vinyl siding and covered by a side gable roof
114-0118-0126	House	314	Cooper Street	1949	1-story, 3-bay, vernacular dwelling clad in vinyl siding and covered by a side gable roof
114-0118-0127	House	313	Cooper Street	1948	1-story, 3-bay, vernacular dwelling clad in vinyl siding and covered by a side gable roof

DHR Number	Property Name	Property Address Number	Property Street Name	Year Built	Description
114-0118-0128	House	312	Cooper Street	1949	1-story, 3-bay, vernacular dwelling clad in vinyl siding and covered by a clipped, side gable roof
114-0118-0129	House	311	Cooper Street	1948	1-story, 3-bay, vernacular dwelling clad in vinyl siding and covered by a side gable roof
114-0118-0130	House	310	Cooper Street	1949	1-story, 3-bay, vernacular dwelling clad in vinyl siding and covered by a side gable roof
114-0118-0131	House	309	Cooper Street	1948	1-story, 3-bay, vernacular dwelling clad in vinyl siding and covered by a side gable roof
114-0118-0132	House	307	Cooper Street	1948	1-story, 3-bay, vernacular dwelling clad in vinyl siding and covered by a hipped roof
114-0118-0133	House	305	Cooper Street	1948	1-story, 3-bay, vernacular dwelling covered by a side gable roof
114-0118-0134	House	202	Cooper Street	1905	2-story, 2-bay, vernacular dwelling clad in vinyl siding and covered by a front gable roof
114-0118-0135	House	200	Cooper Street	1905	2.5-story, 3-bay, Queen Anne-style dwelling clad in flat-bottom asbestos siding and covered by a front gable roof
114-0118-0137	House	300	Creek Avenue	1930	1.5-story, 3-bay, bungalow dwelling clad in weatherboard and covered by a hipped roof
114-0118-0150	House	807	Marshall Street	1910	2.5-story, 2-bay, American Foursquare dwelling clad in flat-bottom asbestos shingles and covered by a hipped roof with a hipped-roof dormer
114-0118-0151	House	718	Marshall Street	1880	1-story, 3-bay, T-Plan dwelling clad in vinyl siding and covered by a cross gable roof
114-0118-0153	House	415	Colbert Avenue	1905	2.5-story, 3-bay, Queen Anne-style dwelling clad in wood siding and covered by a front gable roof
114-0118-0154	House	421	Colbert Avenue	1905	2.5-story, 3-bay, Queen Anne-style dwelling clad in wood siding and covered by a front gable roof
114-0118-0155	House	423	Colbert Avenue	1942	1-story, 3-bay, vernacular, single-family dwelling clad in aluminum siding and covered by a side gable roof
